CONCRETE PRODUCT PLANTS

Our customized cement and aggregate batchers are designed to your exact size and specifications.

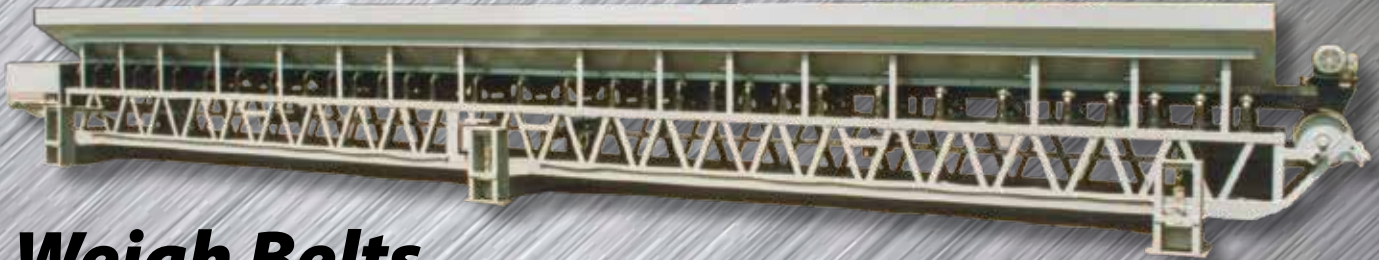

Our aggregate storage bins can be custom built to set inside buildings.

Multiple compartment configurations available with: aggregate batchers or weigh belts. Truss conveyors, radial stackers or shuttle belts can be used to fill aggregate bins.

Shuttle Conveyors

Weigh Belts

Special Material Handling Conveyors

Screw Conveyors

Screw conveyors can also be
custom built to customer's
required length
6"-14" Screws are available

Stephens can custom build the plant to fit in an existing building or around existing equipment.

What ever your equipment needs are, we can custom design for your application.

We have several different styles of silos available including: round, rectangular and multiple compartment.

At Stephens, we can design your plant to charge any skip hoist or mixer (both by others).

We can also build custom “gob” hoppers and wet “mud” belts.

Mixers can be mounted on independent mixer support frames or beneath cement silos.
